

## Module 2: Git Assignment

---

### Problem Statement:

Create a txt file, and do the following commits in them:

1. Add first line as "this is first commit"
2. Create a feature branch f1, in this branch change this txt file and add second line as "this is feature1"
3. From master, create another feature branch f2, add in txt file second line as "this is feature2"
4. Merge f1 on master

While merging f2 there were some errors, resolve the errors and submit the github repo
